

1 I Claim:

2 1. A tilted U-shaped device having two arms and a base formed from a channel of plastic,
3 which channel exteriorly covered with a layer of padding to protect the forearm from dirt and
4 injury,

5 said device adapted to fit over the edge of a table for use by bingo and other game players.

6 2. The device of claim 1, wherein the plastic is acrylic and the padding is neoprene.

7 3. The device of claim 1, wherein the open corners of the device on the ends of the arms
8 are chamfered.

9 4. The device of claim 1, wherein the opening at the front of the U is narrower than the
10 opening at the base of the U to provide a friction fit over the table edge.

11 5. A tilted U-shaped device formed of acrylic plastic channel about eight inches long,
12 covered over on the exterior by a layer of neoprene padding, and having a pair of arms and a
13 base, which is adapted to fit over a table edge with the table fitting within the opening of the
14 channel.

15 6. The device of claim 5, wherein the opening at the front of the U channel is less than
16 the width of the opening between the two arms.
